## Tonero: Consider the facts

Toyota Material Handling: Boost your Productivity

**Fact:**

Every 12 minutes someone buys a Toyota IC forklift. Over 400,000 SAS equipped IC trucks have been sold across the world. When you choose Toyota you benefit from the shared experience of the world's number one forklift manufacturer and some of the most successful businesses across dozens of industries worldwide.

**Fact:**

Toyota's commitment to helping you maximise your productivity doesn't stop with the industry leading Tonero range. You can also benefit from a complete range of material handling equipment, from pallet trucks to reach trucks, as well as 24/7 service support, driver training or even a bespoke fleet management programme.

**Fact:**

Only Toyota trucks offer the productivity enhancing features of our unique System of Active Stability, allowing you to operate at maximum productivity without compromising safety.

**TONERO<sup>+</sup>** Productivity

A range of Tonero+ Productivity options let you tailor your truck to your business. Options to further enhance productivity include a swivel seat that turns and locks for easier reversing, a rear assist grip handle to relieve operator back strain when reversing, and hydraulic cushioned forks for driving on uneven surfaces

!!! Boost your productivity:

# 10 Reasons why a Toyota forklift is more productive

- 1 Toyota's unique System of Active Stability (SAS) not only helps to prevent accidents but also makes repetitive loading and unloading operations quicker and safer.
- 2 SAS Automatic Fork Levelling sets the forks to a horizontal position at the touch of a button.
- 3 The SAS Active Steering Synchroniser constantly re-aligns the steering wheel with the rear wheels, so the truck always starts off in the direction expected.
- 4 Toyota's IC trucks deliver class leading cycle time productivity thanks to a purpose built range of diesel and LPG engines.

*A choice of 2 Toyota Diesel engines is available depending on power requirements*

*Toyota LPG engines provide reliable productivity and power.*

- 5 The range of Toner + Productivity packages let you tailor the features of the truck to the specific needs of your business, further enhancing productivity.
- 6 Operator Total Care (OTC) lets you maximise the comfort and ergonomics of each truck. Options such as fingertip controls, multi-function mini-levers, or the D2 pedal that allows forward and reverse direction control from one pedal all make significant improvements to productivity and profitability.
- 7 The superior comfort of Toyota forklifts have been proven to reduce operator fatigue and enhance both safety and productivity.
- 8 Toyota's industry leading build quality and reliability ensure maximum up-time.\*
- 9 The support of the world's number one forklift manufacturer, delivered direct or through a local dealer.
- 10 With over 400,000 SAS equipped Toyota IC forklifts sold, Toyota engineers have a unique insight into how they can help make your business more profitable.

## Improved Productivity

At Toyota we understand that high performance means little without reliability. That's why when we created the new Toyota Toner we not only designed a more productive truck, we engineered an even more reliable one. With a choice of purpose built diesel or LPG engines delivering power and handling that's second to none, the new Toner is the most productive engine powered forklift in its class. Combine this with the quality and reliability that has helped make Toyota the world's number forklift manufacturer and it's easy to see why the Toner really is the next generation in forklifts.
